GAMMEX[®] PI Plus Glove-in-Glove[™] System

SURGICAL GLOVES

Polyisoprene inner and outer surgical gloves, pre-donned and ready for double gloving

- Effortless double gloving: The GAMMEX[®] PI Plus Glove-in-Glove[™] System is a unique two-in-one system with both inner and outer polyisoprene surgical gloves already pre-donned and aligned at the fingertips, enabling wearers to double glove in one don and save half the donning time
- Sustainable packaging: Being pre-donned, the inner and outer sterile gloves are packed in one inner wrap for a 50% reduction of paper
- Advanced allergy prevention: These non-latex gloves present no risk of latex allergies and do not contain chemical accelerators known to cause allergic contact dermatitis
- **Ergonomic comfort:** Certified by United States Ergonomics for superb wearer comfort and performance
- Effortless donning and doffing: Ansell's donning aid technology facilitates easy donning and doffing of the outer glove during intraoperative changes

Recommended For

- All surgeries, especially high risk procedures in orthopaedics, trauma, and cardiac
- Easy identification of a glove breach
