## Latex, powder free micro surgical gloves offer exceptional tactile sensitivity and dexterity

- **Heightened dexterity:** Being 20% thinner than Ansell's standard powder-free latex gloves, GAMMEX<sup>®</sup> Latex Lite offer exceptional level of tactile sensitivity and dexterity preferred for delicate procedures
- **Elevated ergonomic comfort:** Ansell's unique anatomic glove formers deliver surgical gloves designed for enhanced comfort and movement to help reduce hand fatigue
- **Double-gloving versatility:** This micro glove's brown color diminishes surgical glare while offering the wearer the option to use it as an inner glove when double gloving for easy breach detection
- **Enhanced donning aid:** A unique internal coating enables easy donning and doffing under dry or damp hand conditions, be it the first don or during intra-operative changes

**CAUTION:** Safe use of these gloves by latex-sensitized individuals has not been established. This product contains natural rubber latex, which may cause allergic reactions.

### Recommended For

- All surgeries, especially delicate procedures in ophthalmology, micro, and cardiovascular
- Enhanced tactile sensitivity and dexterity, especially for delicate procedures
- Damp donning
- Prevention of eye fatigue
