

O7-112Anti-Vibration Glove

Previously known as: VibraGuard® 07-112

Vibratio

Heavy Duty

Nitrile-coated anti-vibration work gloves, minimizing the effects of harsh vibrations

- Optimized versatility: Beyond granting snag and abrasion resistance, the full-fingered ActivArmr[®] 07-112 heavy-duty gloves are finished with fully impregnated nitrile coating
- Maximized protection: Thanks to their Ansell Vibration Foam Gel padding, these protective gloves guard against hand and finger injuries (including hand-arm vibration syndrome, or HAVS) due to prolonged vibration exposure and are ideal for tasks involving vibrations at frequency levels over 300Hz
- Reduced surface defect risks: Being silicone-free, they create a lesser risk of contaminant transfer to metal before painting
- Extended glove life: ActivArmr[®] 07-112 hand protection gloves are also machine washable, for longer wear

Industries

- Automotive
- Metal fabrication
- Agriculture
- Automotive Aftermarket
- Oil and gas

Applications

- Handling metal sheets & panels
- Metalworking & assembly operations
- Handling rough machined metal parts
- Handling materials with sharp or rough edges

07-112 **Anti-Vibration Glove**

Previously known as: VibraGuard®07-112

Key Features

- Nitrile coating: Shock-absorbent safety gloves
- Ansell Vibration Gel Foam padding: Reduced vibration transmission
- Silicone-free design: Reduced risk of surface defects

Vulcanization Chemical Accelerators

• Natural rubber proteins

Only a very small number of users may be sensitive to this ingredient(s) and hence may develop irritant and/or allergic contact reactions.

Performance Standards & Regulatory Compliance
