ADVANCED MECHANICAL PROTECTION

## 11-812

Designed to easily tear apart at multiple high risks areas

Multi Purpose

Cut

Ergonomic Protection

Light Duty

## Ultra-thin light-duty gloves designed to preemptively tear if entangled in rotating tools

- **Specialized protection:** Designed for the operation of rotating machinery, HyFlex® 11-812 industrial gloves' ultra-thin liner deliberately tears when they become entangled and the wearer is at risk of severe injury
- **Advanced comfort and dexterity:** Developed with ERGOFORM™ Technology and ZONZ™ Comfort Fit knitwork, these HyFlex® gloves offer users a tailored fit, for less strain and tension and greater comfort and dexterity
- **Heightened tactility:** Their thin liner also enhances tactile sensitivity, making them ideal for delicate handling
- **Certified skin-friendly and harm-free:** They are Dermatest®-approved, solvent-free, and Oekotex®-certified for no harmful substances

### Usage precautions

- This glove will not directly protect the worker from injuries caused by contact with a sharp or high-speed rotating machine.
- If a glove becomes entangled in a rotating machine, whether or not it tears, it should be discarded and not used again.
- HyFlex® 11-812 industrial gloves have been designed for rotating tools with a minimum torque of 10 Nm [7.4 ft-lb], reaching speeds of over 200 rotations per minute (RPM).
- HyFlex® 11-812 safety gloves are not recommended for rotating tools with lower torque and/or speed levels. An in-depth analysis of application requirements, using AnsellGUARDIAN®, is essential before use.
