

GAMMEX® Non-Latex Pl Ortho

SURGICAL GLOVES

Ultra-thick, skin-friendly polyisoprene surgical gloves to help withstand the rigors of surgery

- Enhanced protection: GAMMEX[®] Non-Latex PI Ortho surgical gloves are 50% thicker than Ansell's standard latex gloves, delivering added protection when handling power tools and or when bone fragments are present
- Exceptional allergy prevention: These non-latex gloves eliminate the risk of a latex allergy, while their skin-friendly, non-sensitizing polyisoprene formulation is free from chemical accelerators known to cause allergic contact dermatitis
- **Secure grip:** A unique external surface treatment enables the firm and secure grip needed to handle power tools
- Effortless donning: Ansell's donning aid technology feature an internal polymer coating that facilitates easy donning as well as doffing
- Chemo-tested: These surgical gloves have been tested for permeation per ASTM D6978 requirements for use across a wide range of cytotoxic drugs***

***Contact Ansell Customer Service for specific chemotherapy drug permeation times and recommendations

Recommended For

- All surgeries, especially high risk procedures in orthopaedics, trauma, and cardiac
- Damp donning
- Protection from chemical accelerators such as thiurams, carbamates and mercaptos known to cause chemical Type IV allergies

FEATURED TECHNOLOGIES

GAMMEX® Innovation that Protects

Driven by innovation, GAMMEX[®] surgical gloves are engineered to respond to the evolving user needs of the surgical community. Featuring unique formulations and cutting-edge technologies, ergonomic comfort and superior protection, healthcare workers around the world entrust their hands to ours.

GAMMEX® Non-Latex PI Ortho
