

Previously known as: MICROGARD® 2500 Cape Hood - Model 507

## Combines exceptional mechanical strength with excellent liquid and particulate protection..

### DESIGN

MICROGARD® 2500 is a durable microporous polypropylene laminate which provides an excellent barrier to chemical spray and infective agents. This specialist fabric is also breathable to help ensure user comfort. The fabric's physical strength and flexibility ensures protection and comfort even in the harshest environments.

### ULTRASONICALLY WELDED SEAMS

Provides a strong liquid and particle barrier

### CAPE HOOD FEATURES

- Balaclava style cape hood covering part of shoulders
- Velcro fastening to front
- Bound seams

### COLOURS

White

### SIZES

One size

## Industries

- Life Sciences
- Industrial
- Chemical

## Applications

- Transferring liquids and solids
- Tank Cleaning
- Spill or leakage cleanup
- Maintenance

## KEY FEATURES & BENEFITS

- The fabric achieves the highest classifications for protection from biological agents in accordance with EN 14126 for penetration of blood, body fluids and blood-borne pathogens
- Unique material offering exceptional strength, liquid and particulate protection
- Low linting reduces risk of contamination in critical areas

## Material Diagram

## Seam Diagram

## Performance Standards

EN ISO 13688:2013

## Product Information

| Product Information |  |
|---------------------|--|
| Available Sizes     | One Size                                     |
| Color               | White  |
| Product Material    | Microporous Polypropylene Laminate non-woven |
| Product Reference   | 2500 Cape Hood - Model 507                   |
| Standards Overview  | CE CATEGORY III (Type PB (6)-B, EN 14126)    |
| Seam Type           | Bound  |
| Style Number        | W25B507                                      |
