

Previously known as: MICROGARD® 2000 Apron - Model 213

Protective apron designed with microporous laminate material, for advanced safety and breathable comfort

- **Specialized protection:** This AlphaTec® apron ensures barrier protection and resists saturation when confronted with low-concentration liquid chemicals, liquid and particulate* biological hazards
- **Heightened breathability:** The use of microporous laminate technology in its fabrication makes for a protective apron that enables water vapor (perspiration) to escape easily
- **Reduced contamination risks:** Due to the low-linting nature of this protective apron's microporous polyethylene laminate nonwoven material, potential contamination risks are also reduced
- **Optimized fit:** It is also designed to offer wearers a perfect combination of fit, comfort and personal protection

*filters 100% of particulates down to 0.01 microns in size

Industries

- Life Sciences
- Metal fabrication
- Food Processing

Applications

- Clean room cleaning and preparing
- Production line support & maintenance
- Maintenance of plant and machines
- Veterinary Services
- Cleaning of plant and machines
- Body painting including surface inspection

AlphaTec®

ADVANCED CHEMICAL PROTECTION

2000 Apron - Model 213

Superior breathable microporous laminate technology

Previously known as: MICROGARD® 2000 Apron - Model 213

PRODUCT INFORMATION

- **Protective barrier:** Low-concentration liquid chemicals, liquid and particulate biohazards
- **Low-linting microporous laminate:** Breathable comfort with lower contamination risks
- **Optimized fit:** An ideal balance of comfort and safety
